

## Description

**BC250MO** is a very high impact polypropylene heterophasic copolymer intended for injection moulding. This grade is characterized by combination of good stiffness, good creep resistance and very high impact strength even at low temperatures. This grade features high impact strength, high thermal stability and very good processability. As all polypropylenes, this grade shows excellent stress-cracking and chemical resistances.

This grade is mildly nucleated to maximize the mechanical stiffness. The additive formulation provides a smooth demoulding. Nucleation, good flow properties and high stiffness create a high potential for cycle time reduction.

**CAS-No.** 9010-79-1

# **Applications**

Crates and boxes Pallets Technical parts

# **Special Features**

Very good processability High melt stability Good stress crack resistance

Bottle trays

Containers

Luggage

Good chemical resistance Good stiffness

# **Physical Properties**

Property	Typical Value Data should not be used for	Test Method specification work	
Density	905 kg/m³	ISO 1183	
Melt Flow Rate (230 °C/2,16 kg)	4 g/10min	ISO 1133	
Flexural Modulus	1.100 MPa	ISO 178	
Tensile Modulus (1 mm/min)	1.200 MPa	ISO 527-2	
Tensile Strain at Yield (50 mm/min)	5,5 %	ISO 527-2	
Tensile Stress at Yield (50 mm/min)	23 MPa	ISO 527-2	
Heat Deflection Temperature (0,45 N/mm <sup>2</sup> ) <sup>1</sup>	80 °C	ISO 75-2	
Charpy Impact Strength, notched (23 °C)	25 kJ/m²	ISO 179/1eA	
Charpy Impact Strength, notched (-20 °C)	7,5 kJ/m²	ISO 179/1eA	

<sup>1</sup> Measured on injection moulded specimens acc. to ISO 1873-2

## **Processing Techniques**

This product is easy to process with standard injection moulding machines.

Following moulding parameters should be used as guidelines:

Melt temperature Holding pressure Mould temperature Injection speed 230 - 260 °C 200 - 500 bar 10 - 30 °C As high as possible.

Minimum to avoid sink marks.

Shrinkage 1 - 2 %, depending on wall thickness and moulding parameters

### Storage

**BC250**MO should be stored in dry conditions at temperatures below 50°C and protected from UV-light. Improper storage can initiate degradation, which results in odour generation and colour changes and can have negative effects on the physical properties of this product.

## Safety

The product is not classified as dangerous.

### Recycling

The product is suitable for recycling using modern methods of shredding and cleaning. In-house production waste should be kept clean to facilitate direct recycling.

Please see our "Safety data sheet" / "Product safety information sheet" for details on various aspects of safety, recovery and disposal of the product. For more information, contact your Borealis representative.

### **Related Documents**

The following related documents are available on request, and represent various aspects on the usability, safety, recovery and disposal of the product.
